MERN Stack Developer with a strong foundation in **MongoDB, Express.js, React.js, and Node.js**, with hands-on experience in developing **RESTful APIs**. Skilled in both front-end and back-end development, creating responsive and user-friendly applications. Seeking a challenging opportunity where I can continuously develop my technical skills while contributing to the success of the organization by delivering innovative, user-friendly web solutions.

EDUCATION

B-Tech in Electronics & Communication Engineering, 68.30 % 2021 - 2024
Tulsiramji Gaikwad Patil College of Engineering and Technology, Nagpur
RTMNU University

Diploma in Electronics & Telecommunication Engineering, 82.88% 2019 - 2021
Government Polytechnic, Gondia
Maharashtra State Board of Technical Education

PROJECTS

Video Library – MERN Stack Application

- Developed a full-stack **video library platform** that allows users to browse, watch, and manage videos with role-based access for admins and users. Implemented core features like video management, user authentication, search, and interactive functionalities (likes, comments, watch later).
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, Redux, Bootstrap, Material UI

Responsibilities:

- RESTful APIs** for user registration, login, video management, and interactions (likes, comments, search)
- Created a **responsive and interactive UI** with React.js and Redux for state management Implemented **video categorization, search, and watch-later functionality** for enhanced user experience, Optimized **database queries and indexing** to improve video loading and search efficiency

IoT Based Remote Patient Health Monitoring System

- This project aimed to continuously monitor vital health parameters such as heart rate and body temperature, facilitating real-time data access for healthcare providers and family members. My role focused on PCB design and establishing a connection between the ESP32 microcontroller and ThingSpeak, an IoT analytics platform.
